Education

- **IES Hermanos Amoros**
Intermediate Vocational Training in Microcomputer Systems and Networks
Completed in 2021
- **IES Hermanos Amoros**
Higher Vocational Training in Web Application Development
Completed in 2024
- **IES Paco Mollá**
Specialization Course in Video Games and Virtual Reality
Completed in 2025

Skill

- C++
- Unreal Engine
- Tools Development
- Engineering
- Problem solving
- High debug skills

Languages

- Spanish - Native
- English - Fluid
- Valencian - Fluid
- German - Amateur

Beyond Coding

- Dog caretaker and trainer at a shelter
- Experienced swordman
- Write novels on free time

Kingsley Shyne Mattis Sogorb

Systems / Tools programmer

Profile

Systems and tools programmer with strong expertise in Unreal Engine and C++. Specialized in designing modular plugins and internal tools to enhance developers' workflow. Passionate about creating scalable and optimized solutions for game engines.

Projects

2019 - 2024

Avtrix Games (indie), Remote

Systems and mechanics programmer

Created a complex combat engine with bone and armor damage combined with a dismemberment system. Implemented parkour system to allow vertical movement for the player. Programmed faction-based NPCs combat AI. A flexible communication of the player with the world through interactions. And added an inventory system

2024 - Present

Plugin developer for Unreal Engine 5

Created an all-in-one free combat plugin that opens the door to fast prototyping complex ideas. Currently building a modular ecosystem of plugins for Unreal Engine, focused on seamless integration and extensibility. Each tool works independently but enhances functionality when combined, providing flexible solutions for game developers.

Internships

2021

Devilish Games

Games prototype programmer

Developed numerous mobile games prototypes with Unity. Highlighting the project of the parking simulator and space cars racing with planet physics.

2023

Devilish Games

Gameplay programmer

Programmed the gameplay of a 2.5D prototype platformer with a seamless integrated parkour system, invisibility powers and interactive traps using Unity Engine and the language c#.
