

Kingsley Shyne Mattis Sogorb

Game Programmer — Unreal Engine / C++

Email: example@mail.com

Location: Spain (Open to Relocation: Germany / Poland) — Remote Available

PROFESSIONAL SUMMARY

Mid-senior Game Programmer specializing in systems, gameplay engineering, performance optimization, and internal tooling using Unreal Engine 4/5 and modern C++. Strong understanding of engine structure, modular systems, profiling, debugging, automation pipelines, and cross-team technical support. Focused on stability, clean architecture, and solving real production problems.

CORE SKILLS

- C++ (memory, performance, multithreading)
- Unreal Engine 4/5 (GAS, Subsystems, Plugins, Editor Tools)
- Gameplay Systems, AI Components, DataAssets, Optimization
- CPU/GPU profiling, debugging tools, performance analysis
- Tooling, workflow automation, asset/pipeline validation
- Perforce, Git — strong version control discipline
- English: Fluent — Spanish: Native

PROFESSIONAL EXPERIENCE

Gameplay & Systems Programmer — Freelance / Personal Projects (2021–2025)

- Developed modular gameplay systems in C++ for UE4/UE5 (inventory, abilities, combat logic).
- Created internal tools: asset processors, validation systems, diagnostics utilities, editors.
- Implemented high-performance code using SIMD and efficient data layouts.
- Built pipeline automation solutions for design/art teams to prevent content errors.
- Optimized loading times, draw calls, hot-path functions, and memory usage.

Technical Programmer — Unreal Engine Projects (2018–2021)

- Implemented gameplay core systems: interaction, UI logic, camera, simple physics.
- Built editor plugins in C++ for workflow improvements and batch tooling.
- Researched rendering, threading models, engine internals, and performance strategies.

EDUCATION

Continuous training in C++, engine architecture, and Unreal Engine (advanced courses, documentation-driven development, system-level design).

PROJECTS / CODE SAMPLES

Available on request or through private Git/Perforce repositories depending on employer requirements.
